Aenco does not make and expressly disclaims all representations and warranties (whether express or implied by statute or otherwise) whatsoever, including but not limited to: any representations or warranties relating to merchantability, fitness for a particular purpose, description, suitability or non-infringement; that the contents of this document are accurate and free from any errors; and that such contents do not infringe any third party rights.

Aenco shall have no liability or damages of any kind arising out of the use, reference to or reliance on the contents of this whitepaper. This whitepaper may contain references to third-party data and industry publications. As far as Aenco is aware, the information reproduced in this whitepaper is accurate and that its estimates and assumptions are reasonable. However, there are no assurances as to the accuracy or completeness of this information.

Although information and data reproduced in this whitepaper are believed to have been obtained from reliable sources, we have not independently verified any of the information or data from third party sources referred to in this whitepaper or ascertained the underlying assumptions relied upon by such sources. As of the date of publication of this whitepaper, Aenco is not aware of any potential uses outside of the Aenco Ecosystem and are currently not permitted to be sold or otherwise traded on third-party exchanges.

This whitepaper does not constitute advice nor a recommendation by Aenco, its officers, directors, manager, employees, agents, advisors, or consultants, or any other person to any recipient of this paper on the merits of participation in the Aenco Token Sale. Participation in the Aenco Token Sale carries substantial risk that could lead to a loss of all or a substantial portion of funds used to purchase the Token.

No promises of future performance or value are or will be made with respect to Tokens, including no promise of inherent value, no promise of continuing payments, and no guarantee that AEN Tokens will hold any particular value. Unless prospective participants fully understand and accept the nature of Aenco's proposed business and the potential risks inherent in AEN Tokens, they should not participate in the Aenco Token Sale.

AEN Tokens are not being structured or sold as securities. AEN Tokens are not a participation in Aenco and AEN Tokens hold no rights in Aenco. AEN Tokens are sold with an intended future functionality on and access to the platform to be developed by Aenco and all proceeds received during the Token Sale may be spent freely, by Aenco.

This whitepaper does not constitute a prospectus or offering document and is not an offer to sell, nor the solicitation of an offer to buy any investment or financial instrument in any jurisdiction. AEN Tokens should not be acquired

for speculative or investment purposes with the expectation of making an investment return. No regulatory authority has examined or approved any of the information set out in this whitepaper. AEN Tokens could be impacted by regulatory action and changes, including potential restrictions on the ownership, use, or possession of such tokens. Regulators or other competent authorities may demand that AEN Tokens revises the mechanics and functionality of AEN Tokens to comply with regulatory requirements or other governmental or business obligations. Nevertheless, Aenco believe they have taken commercially reasonable steps to ensure that its planned mechanics are proper and in compliance with currently considered regulations. Aenco is in the process of undertaking further legal and regulatory analysis of the functionality and mechanics of AEN Tokens. Following the conclusion of this analysis, we may be required to amend the functionality of AEN Tokens in order to ensure compliance with any legal or regulatory obligations that apply to us. We shall update this whitepaper and publish a notice on our website in the event that any changes are made to the AEN Token.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This whitepaper contains forward-looking statements or information (collectively "forward-looking statements") that relate to Aenco's current expectations and views of future events. In some cases, these forward-looking statements can be identified by words or phrases such as "may", "will", "expect", "anticipate", "aim", "estimate", "intend", "plan", "seek", "believe", "potential", "continue", "is/are likely to" or the negative of these terms, or other similar expressions intended to identify forward-looking statements. Aenco has based these forward-looking statements on its current expectations and projections about future events that it believes may affect its financial condition, results of operations, business strategy, financial needs, or the results of the token sale or the value or price stability of AEN Tokens.

In addition to statements relating to the matters set out here, this presentation contains forward-looking statements related to the Company's proposed operating model. The model speaks to its objectives only, and is not a forecast, projection or prediction of future results of operations. Forward-looking statements are based on certain assumptions and analysis made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments and other factors it believes are appropriate, and are subject to risks and uncertainties. Although the forward-looking statements contained in this presentation are based upon what the Company believes are reasonable assumptions, these risks, uncertainties, assumptions, and other factors could cause the Company's actual results, performance, achievements, and experience to differ materially from its

expectations which are expressed, implied, or perceived in forward-looking statements. Given such risks, prospective participants in this token sale should not place undue reliance on these forward-looking statements.

First Blockchain-based Healthcare Technology Financial Solutions Platform

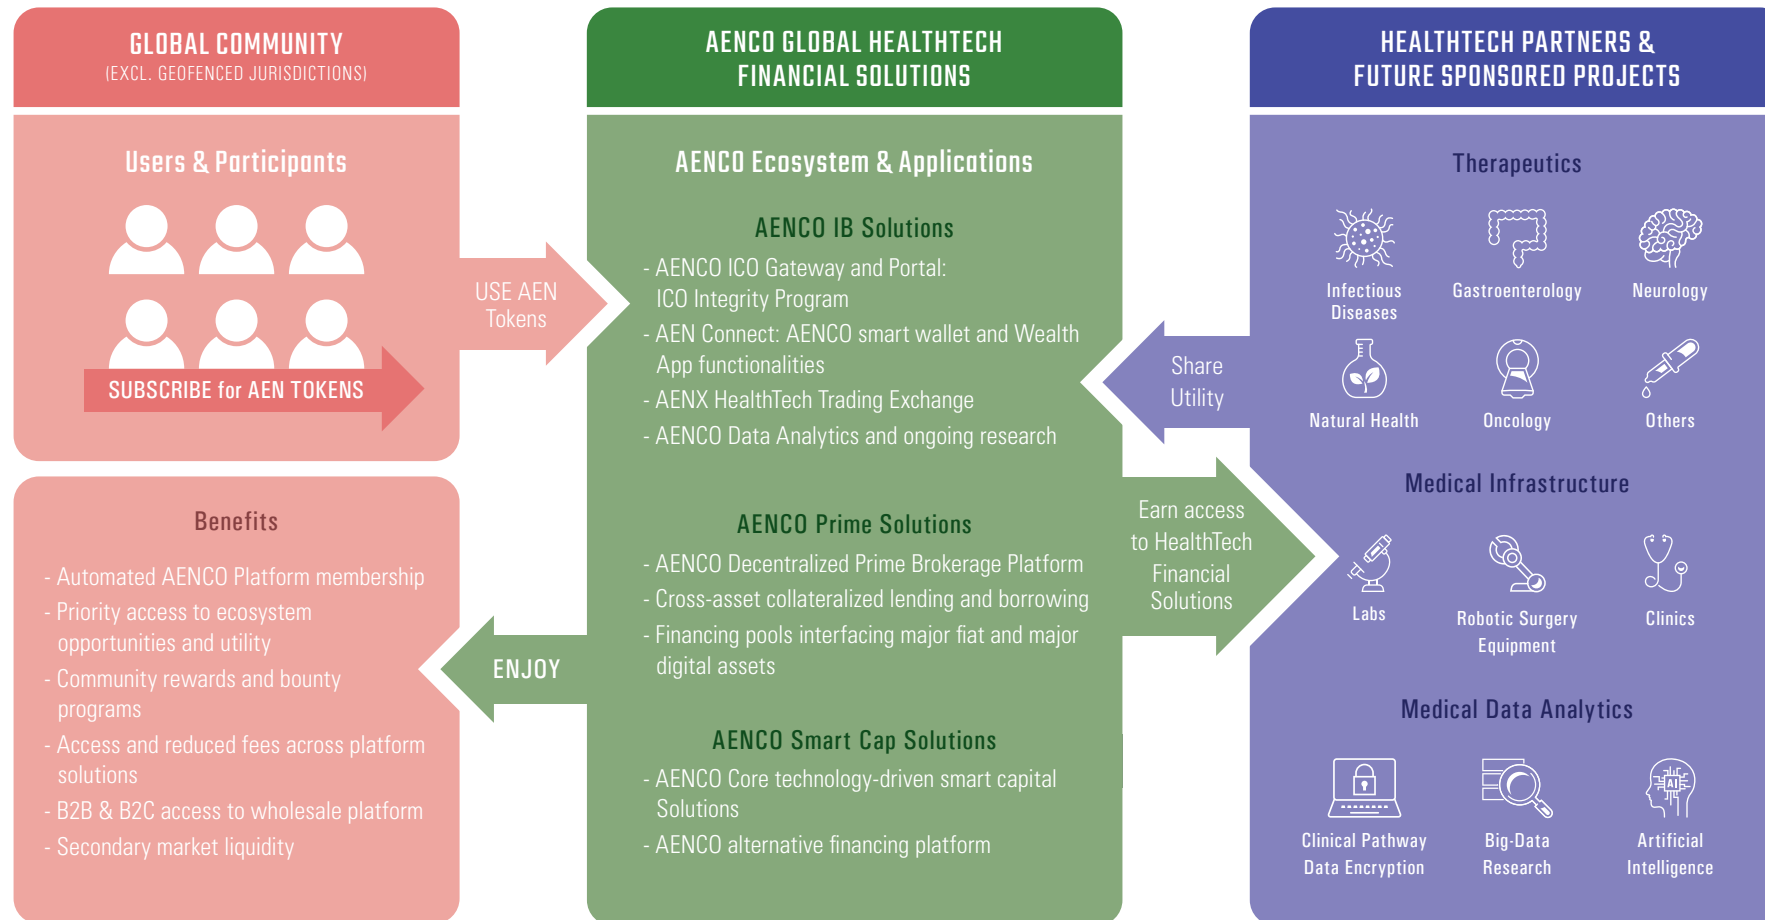

1. Aenco is the world's **FIRST Blockchain based Healthcare Technology Financial Solutions Platform**, that leverages healthtech with institutional financing, prime brokerage, and smart capital solutions under one umbrella.
2. Aenco is a “**one stop shop**” for the delivery of cutting edge financial solutions for the HealthTech industry, as well as a research and collaboration hub for healthcare blockchain companies and projects.
3. Aenco is combining its **core financial ecosystem** with the wider healthcare technology community, through the AEN token, as the key ecosystem building block and extensions.
4. Aenco is supported by the group's evolving **regulated infrastructure and presence in major jurisdictions** including Europe, Hong Kong, and the United States, through which Aenco will effectively deliver its solutions, generating a significant and rapidly evolving ecosystem.

How It Works?

Our Ecosystem of HealthTech Partners, Innovators, and Users

Note: Each business component of Aenco shall be operated through a relevant licensed entity that is located in a jurisdiction approving its related activities.

What is Aenco's Vision?

We Empower HealthTech Innovators Financially and Connect the Community with Medical Utility

1. To be first and global "HealthTech" blockchain based financial solutions platform leveraging on the strengths of blockchain and decentralized applications.
2. To empower emerging healthcare companies with fintech based solutions, so that they can focus on generating medical solutions for the world.
3. To build an ecosystem encompassing fintech financial solutions specialized in the health technology sector, with its network activity and services fueled by the "AEN" utility token.
4. To be a major player contributing to a new era of trust, openness, and global acceptance for the crypto industry.
5. To conduct a successful token offering via a targeted initial coin offering ("ICO") in 2018, to galvanize the development cycle of the Aenco platform.

The Existing Challenges to HealthTech

- The pairing of **sound Science and sustainable Finance** is essential for medical and health technology innovation.
- Yet steady and impactful **sources of funding** of emerging biotech and medtech companies are intrinsically difficult. i.e. Very capital intensive!
- Today's landscape for **capital raising channels** is traditionally dominated only by the largest players such as global investment banks and venture capital.
- **High entry-barriers and hurdles can prove to be burdensome** for growth companies seeking funding in the form of significantly high fees and opaque access.
- Young companies requiring **institutional grade, one-stop-shop investment banking services** such as financing, underwriting, settlement, custodial, research, and trading services, have little options if they fail to "join the club".
- Meanwhile, there is new age development in **digital finance, blockchain applications**, and growth in circulation of digital assets are opening new financing channels such as Initial Coin Offerings ("ICOs").
- Yet society continues to lack a credible, **globally accredited "standard" for ICO best practice**, cultivating skepticism and distrust towards a financing channel that possesses utmost potential and impact.

The Opportunities

A Pressing Need for Sustainable Medical Innovation

Global unmet healthcare needs and ageing demographics, presents both the need and opportunities for medical entrepreneurialism to develop solutions that have deep societal impact.

Taking traditional funding channels in the U.S. as an example for medical innovation and entrepreneurialism: We see new age financing mechanisms emerging as a significant and impactful source of funding.

Major Challenges To Entrepreneurs and Emerging Growth Companies

Early Stage Seeding

- Heavy reliance on friends, family, grants, government subsidy, and sponsored research
- Little institutional financing support
- Pressure to source capital detracts from critical research process

Venture Capital

- Dilution of equity ownership
- Pressured to create investment exit opportunity (e.g. IPO)
- Non-trivial VC expectations: Near term sales generation, multibillion dollar market sizes etc.

Capital Markets

- High entry barriers in the form of fees and access
- Are you able to 'join the club' for institutional grade investment banking services?
- Burdensome scrutiny and regulation

The Landscape: “ICOs” vs Traditional IPOs

An Increasingly Impactful Form of Empowerment

- Data for 2017 with respect to the size of capital raised via traditional capital markets activity such as initial public offerings (“IPO”) is coming in at USD \$189 billion globally¹(1,624 IPOs).
- In comparison, based on 2017 available figures, the cumulative size of initial coin offerings (“ICO”) and similar blockchain based financing activities since 2014 amounts to USD \$2.4 billion, whereby more than USD \$2.0 billion was raised in 2017 alone²!
- Therefore, blockchain based financing represents c. 1.1 % of capital markets and financing activities globally; and is a hugely untapped form of funding for a broad range of innovative startup companies requiring capital.
- ICOs will soon develop as a mainstream channel for funding through an increasingly robust regulatory framework.
- Aenco and the Aeneas ecosystem seeks to be at the forefront of this sensational development as a major inflection point has come!
